Evergreen Trees

Parts List

Item # 47733

Item # 30374

Item # 3062b

Item # 3941

Item # 4073

Flex Tube

Cheese Wedge

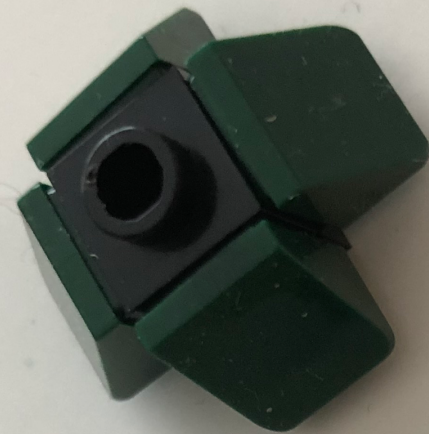

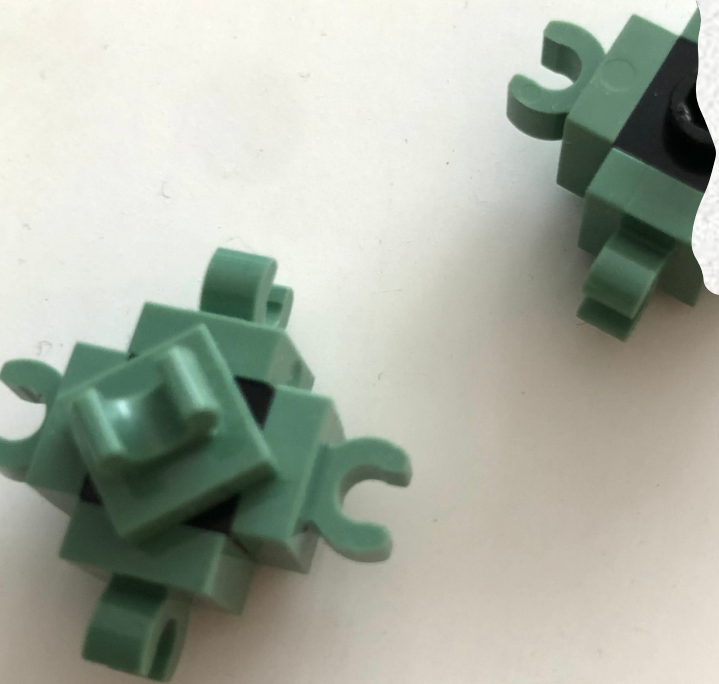

Tile Modified with Clip

The Building of the branches

Clips- Alternate clips by 90°

Wedges- Optional Straight or random depending on the look you are going for

Trunk Assembly

Simply alternate the modified brick and the round 1x1 brick – This would be done with the flex tube up the center

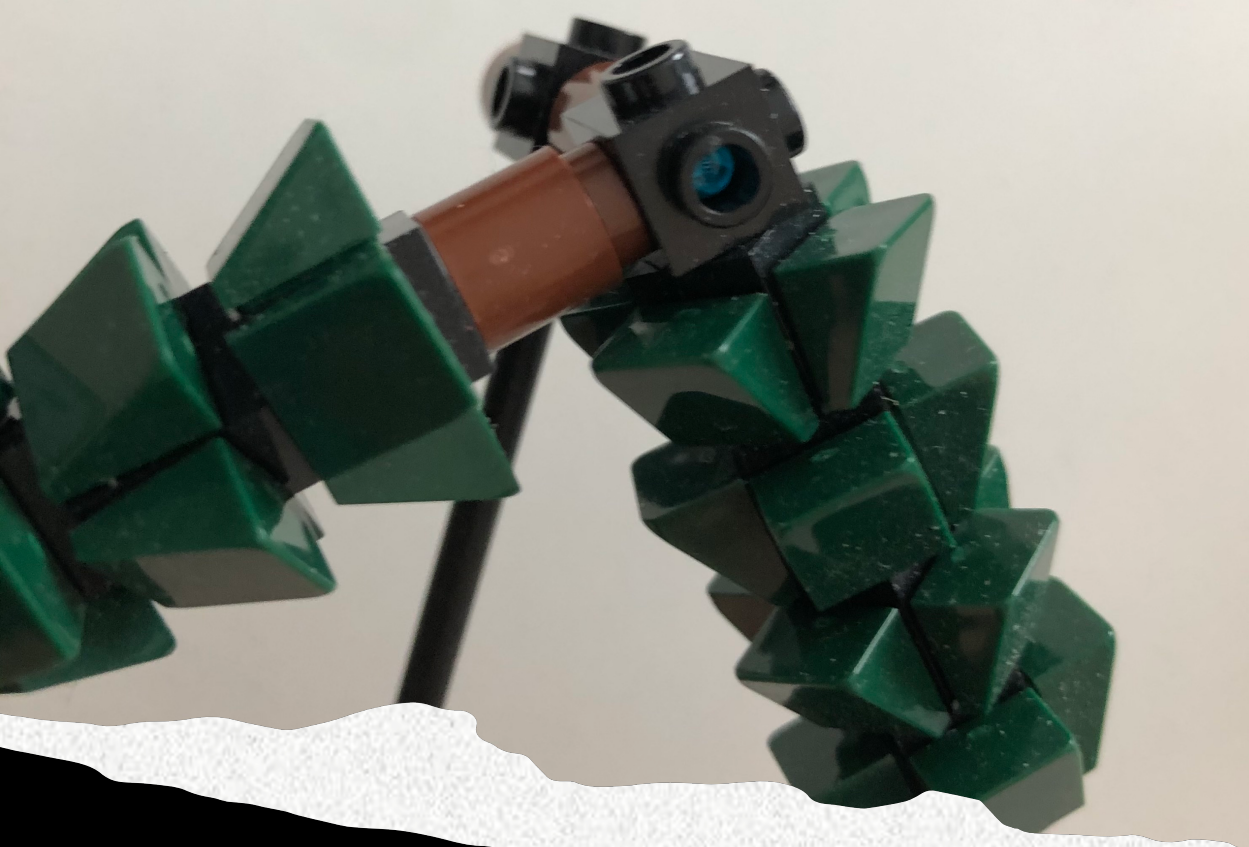

Change up the look by adding more 1x1 rounds in

Adding the branches

The longer branches are the ones you want to add the 4L lightsaber blades.

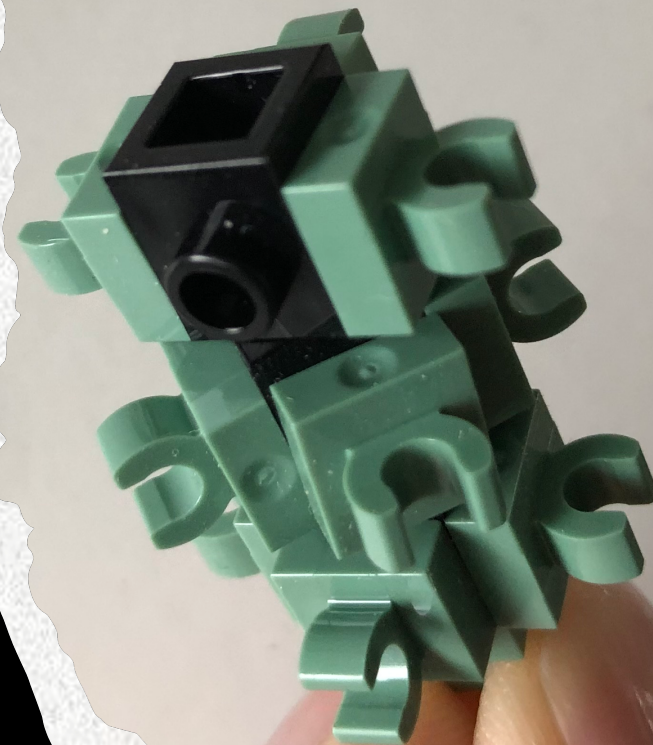

**Getting the clearance to
attach the branches**

Adding 1x1 round brick
and plate will give you
the space to do this.

How to attach the clip tree branches

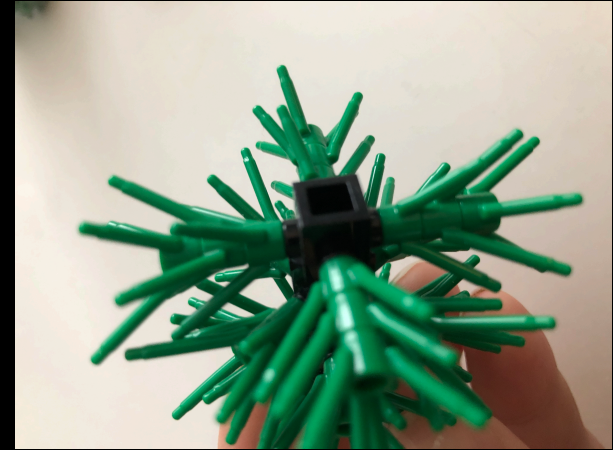

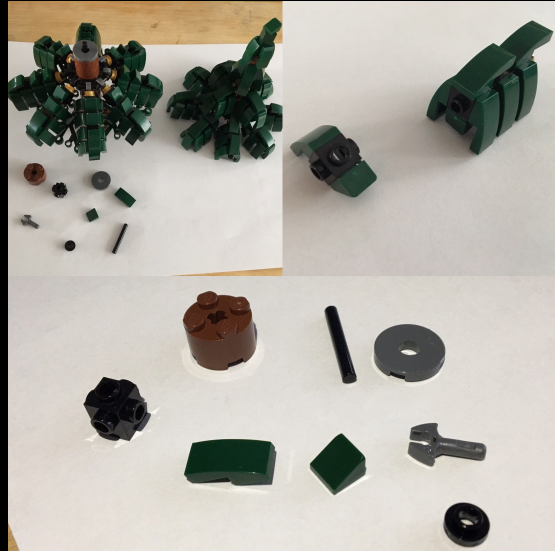

Remove one clip from
the Travis Bricks closest
to the tree trunk on each
branch.

Top and Trunk

Adding a cone to the top helps create a nice shape.
At the bottom of the branches, I like to add the modified round plate with bars to give the underside a better more complete look.

Alternatives

Deciduous Trees

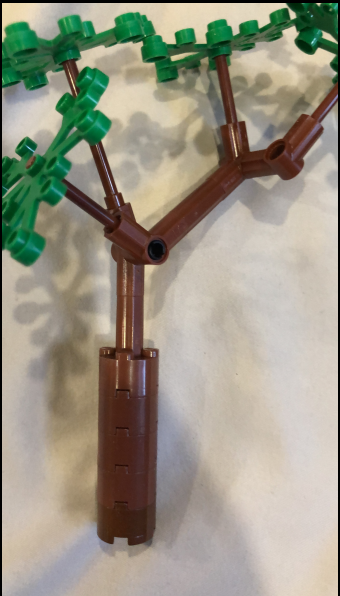

**Simple but
effective**

Shape

Using technic can give you angles that allows for more interesting shaped trees

Colour and texture

Colour used to give you seasons

Use of texture helps breaks up the repetitive patterns and distinguishes the trees from one another

**Why?
Because
adding trees
makes a great
layout event
better**
